

IntelliCode

AI-Powered Bulk Software Defect Prediction Report

Generated on: 11-07-2026 10:25:37

Dataset: **cm1.csv**

Prediction Summary

Metric	Value
Total Modules	498
Healthy Modules	475
Defective Modules	23
Average Risk Score	26.11%
Highest Risk Module	Module 467
Highest Risk Score	86.0%

Top 10 High-Risk Modules

Module	Risk Score	Prediction
467	86.0%	Defective Module
355	85.0%	Defective Module
32	81.0%	Defective Module
362	67.0%	Defective Module
2	66.36%	Defective Module
301	57.0%	Defective Module
459	57.0%	Defective Module
277	57.0%	Defective Module
119	55.0%	Defective Module
103	55.0%	Defective Module

AI Recommendations

- Prioritize testing for high-risk modules.
- Perform detailed code reviews on defect-prone modules.
- Increase unit test coverage for complex modules.
- Refactor highly complex code to improve maintainability.
- Re-analyze the software after implementing improvements.
