

IntelliCode

AI-Powered Software Defect Prediction Report

REPORT INFORMATION

Generated On	11-07-2026 09:47:31
File Name	classobjecteg.py
Analysis Type	Python Static Analysis
Prediction Engine	Random Forest
Status	Analysis Completed

PREDICTION SUMMARY

Prediction	Healthy Module
Risk Score	19.81%
Risk Level	Low

SOFTWARE METRICS

Lines of Code (LOC)	17
Cyclomatic Complexity	1.33
Maintainability Index	100.0

AI ASSESSMENT

The uploaded module appears stable with a relatively low probability of defects. Standard software testing practices should be sufficient.

RECOMMENDED ACTIONS

- Perform detailed code review
- Increase unit test coverage
- Reduce cyclomatic complexity
- Conduct static code analysis
- Execute regression testing
- Monitor maintainability metrics
